

# Sprint 1 Report (January 12<sup>th</sup> – February 22<sup>nd</sup>)

## Sprint Report 2 Video

### What's New (User Facing)

- Fully interactive monthly calendar.
  - Month/year picker
  - Indicates if there are events on any given day
  - Display list of Tacoma Rescue Mission volunteer shifts
  - Pop-up modal displaying event details
    - Name, location, time, slots remaining
    - Portal to website for signup
- Login Screen using Bettergood
- Fully functional app framework in react-native
- Event pulling from trm.org

### Work Summary (Developer Facing)

In this sprint, we've extended the functionality of our backend server proxy to give us more control over the data pulled from VolunteerHub. This proxy allows us to keep our API keys hidden from the client, and sanitize data as needed. API calls to and from the proxy are implemented with Axios API. React components for a calendar have been implemented in such a way that allows for easy component reuse and integration with our API.

### Unfinished Work

Our goals in terms of calendar functionality and backend server proxy were met for this sprint.

We have yet to communicate with Bettergood and get access to their login tokens and API for successfully pulling data on their servers.

## Completed Issues/User Stories

- Extended backend server proxy capabilities
  - Completed by Connor
- Fully interactive monthly calendar.
  - Month/year picker
  - Display's Tacoma Rescue Mission volunteer shifts for each day
  - Pop-up modal displaying event details
    - Completed by Connor
- Working login screen
  - Uses actual GET requests with Bettergood
  - Using webview to load the login form
  - Temporary token being passed down to allow users to access their information
    - Completed by Ethan Frazier
- App and Event pages loaded dynamically
  - Local events are loaded into the app as the app loads
  - Information is current and will update with the app
  - Data is being recognized and parsed and then reformatted for the mobile app
    - Completed by Ethan Frazier

## Incomplete Issues/User Stories

Here are links to issues we worked on but did not complete in this sprint:

- Display organization-wide events in the calendar
  - This feature was not met due to current limitations on our access to TRM databases

## Code Files for Review

Please review the following code files, which were actively developed during this sprint, for quality:

- [server.js](#)
- [CalendarView.jsx](#)
- [DetailModal.jsx](#)
- [MonthYearPicker.jsx](#)
- [Src file screens.js \(all files in this folder\)](#)

# Retrospective Summary

Here's what went well:

- Expanding verbosity of backend server proxy for API calls
- Meeting Calendar component goals
- Successfully fetching event-related data from VolunteerHub database
- Implementing webview for login screen
- Scraping data off website for reformatting in mobile app
- Collaboration for the team
